Discussion:

As a owner i give complete overview about the requirements or project to me developer, what he have to do in project the requirements are followings.

Based on the meeting agenda and the provided project description, here are the requirements for your "2nd Trust" Second-hand Goods Buying and Selling Platform:

- **User Authentication:**

1. Users can register and log in using either email or phone authentication.

- **Product Listing:**

1. Users, including shopkeepers and customers, can post products for sale with details such as pictures, price, and a short description.
2. Shopkeepers can upload multiple pictures for a single product.
3. Shopkeepers can distinguish between brand new and used items when listing products.

- **User Dashboard:**

1. Registered users have access to a dashboard to view details like product history, visited products, and earned coins.

- **Coin Management:**

1. Users earn coins after selling products.
2. After accumulating a certain number of coins, users can purchase products at a discount.

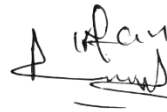

- **Payment Management:**

1. Implement payment management for both shopkeepers and customers.
2. Integrate the Stripe payment gateway for processing payments.

- **Location Tracking:**

1. Users must add their location when listing a product.
2. Customers can view the location of product sellers.

These requirements cover the essential functionalities needed for your "2nd Trust" Second-hand Goods Buying and Selling Platform.

A handwritten signature in black ink, appearing to be 'A. Khan' or similar, with a horizontal line underneath.
