The Psychology of Money

The psychology of money is the study of our behavior with money. Success with money isn't about knowledge, IQ or how good you are at math. It's about behavior, and everyone is prone to certain behaviors over others.

Morgan Housel

Best Seller of New York Times

About The Novel

'The Psychology of Money' is an essential read for anyone interested in being better with money. Fast-paced and engaging, this book will help you refine your thoughts towards money. You can finish this book in a week, unlike other books that are too lengthy.

The most important emotions in relation to money are fear, guilt, shame and envy. It's worth spending some effort to become aware of the emotions that are especially tied to money for you because, without awareness, they will tend to override rational thinking and drive your actions.
